

Vincent Holloway is Vice President for Defense Information Technology Services at Tetra Tech where he is responsible for the strategic investment, business growth, and capability development in the Federal IT Group.

Vince has 38 years of experience working with the U.S. Department of Defense (DoD) in various technical, management, and leadership positions. Prior to joining Tetra Tech, Vince was a program manager, strategic consultant, and subject matter expert across multiple markets in Booz Allen Hamilton. Over 15 years, his clients included US Strategic Command, Defense Information Systems Agency, Missile Defense Agency, and several US Army organizations including Training and Doctrine Command, Program Executive Office Command Control Communications Tactical, Network Enterprise Technology Command, Human Resources Command, Recruiting Command, and Cadet Command.

His experience includes over 20 years as an Army Signal Corps Officer in tactical and technical assignments around the world, including the Training and Doctrine Command, Defense Information Systems Agency, III Corps, V Corps, 7th Medical Command, Joint Logistics Support Command, Army Test and Evaluation Command, and Communications Electronics Command. During his military career, Vince demonstrated expertise and leadership in information technology law and policy, technical program management, operational testing, telecommunications and network engineering, software acquisition management, and tactical network operations.

He holds a bachelor's degree in electrical engineering from the University of Kentucky, a master's degree in Business Administration from Boston University, a law degree from American University, and a Master of Laws degree from Hofstra University.
