

Curriculum Vitae
of
Keith Waters

Keith is an Industry Standards Manager for Schneider Electric USA and is based in Lexington, Kentucky. He is responsible for overcurrent protective device and automation/control product standards, installation codes, enforcement, and holds BSEE degree from the University of Kentucky. Keith is also engaged in applying codes and standards addressing cybersecurity, energy efficiency & sustainability. He also participates in the Power & Energy Institute of Kentucky's Industry Advisory Council. Keith is a licensed Professional Engineer and a Certified Energy Manager. Keith has been an employee of Schneider Electric for 37 years serving in multiple roles including engineering, Global Business Development and Strategic Sales Manager. Keith frequently speaks on various energy efficiency, sustainability, product application, and code compliance topics. He is actively involved with the IEEE Standards Association's Standards Board (RevCom Chair), Industry Application Society's Executive Board and Industrial & Commercial Power Systems leadership. Keith maintains leadership positions within several industry standards technical committees. He is a representative to NEC Code Making Panels 3 and 11; and the NFPA 79 technical committee. Keith has published articles on circuit protection, energy management, electrical controls, and smart manufacturing.
